Salary: \$68,283 - \$88,770 Per Annum

Region: Northeast

Organization:

U.S. Army Engineer District, Baltimore
Engineering Division
Design Branch
Mechanical/Electrical Section

Duty Station: Baltimore, MD

Area of Consideration:

- Army employees with competitive status; and eligible Army CIPMS employees.
- Department of Defense employees serving on a Career or Career Conditional Appointment.
- Interagency Career Transition Assistance Plan (ICTAP) eligibles: Current or former employees displaced from non-DOD agencies. Individuals seeking ICTAP eligibility must submit a copy of their Reduction in Force (RIF) separation notice (Notification Letter of SF 50) and a copy of their most recent performance rating.
- Veterans Employment Opportunities Act of 1998: Veterans who are preference eligible or who have been separated from the armed forces under honorable conditions after 3 years or more of continuous active service may apply.
- Transfer eligibles: current permanent, competitive non-Army Federal employee.
- Reinstatement eligibles: Attained Career status on a permanent, competitive Federal appointment; or Career-Conditional with reinstatement eligibility, generally within 3 years of separation, exceptions 5 CFR 315.201(b)(3).

Duties: Serves as Electrical Engineer Team Leader responsible for development of designs, studies, plans, specifications, and cost estimates for military, civil, and HTRW projects. Serves as a District consultant and expert advisor in resolving novel, extremely technical state-of-the-art, unusual and controversial electrical engineering matters. Serves as Team Leader of in-house produced designs, specifications and cost estimates. Responsible for all electrically related tasks including production and review of designs, cost estimates, specifications, studies, systems analysis, etc. Electrical systems and equipment include computer-controlled UPS systems; high voltage underground and overhead distribution systems, substations and related control and protection equipment; signal systems such as fire, panic, security and telecommunications. These systems normally support multi-functional structures, such as highly technical laboratories, hospitals, communication facilities, training facilities, barracks, munitions facilities, airfields and appurtenant structures, family housing, administration buildings, flood protection facilities and dams, on-site and off-site utility systems, power plants, hazardous and toxic cleaning facilities, waste water treatment facilities, etc. Ensure that the organization's strategic plan, mission, vision and values are communicated to the team and integrated into the team's strategies, goals, objectives, assignment, work plans and work products and services. Serves as liaison between User/customer, Contractor, A/E, area Offices, District, Division, USACE, and other agencies relative to working out solutions of unusually difficult and complex electrical engineering problems. Responsible for the technical review and coordination of engineering activities involving the interrelationship, arrangement and connection of complex electrical distribution, generation, energy monitoring and control systems (EMCS), utilization and illumination equipment. Reviews studies, VE proposals, plans and specifications from the technical accuracy, completeness, biddability, constructability and maintainability point of views to determine suitability for intended use of complex electrical systems and design features. Reviews shop drawings, equipment/systems, specifications, and design analyses from contractors, A/Es, COE TCXs and others for compliance with required operating characteristics, and physical limitations, reflected as shown in contract plans and specifications and as-built conditions. Conducts field studies and investigations at site of proposed work.

Qualification Requirements:

Basic Requirements:

- A. Successful completion of a full four-year course of study in an accredited college or university leading to a bachelors or higher degree in professional engineering. To be acceptable, the curriculum must meet either of the following:
 - (1) Be in a school of engineering with at least one curriculum accredited by the Accreditation Board of Engineering and Technology (ABET) as a professional engineering curriculum
 - (2) include differential and integral calculus and courses (more advanced than first-year physics and chemistry) in five of the following seven areas of engineering science or physics:
 - (a) statics, dynamics
 - (b) strength of materials (stress-strain relationships)
 - (c) fluid mechanics, hydraulics
 - (d) thermodynamics
 - (e) electrical fields and circuits
 - (f) nature and properties of materials (relating particle and aggregate structure to properties)
 - (g) any other comparable area of fundamental engineering science or physics, such as optics, heat transfer, soil mechanics, or electronics.
- B. Combination of education and experience - college-level education, training and/or technical experience that furnished
 - (1) a thorough knowledge of the physical and mathematical science underlying professional engineering
 - (2) a good understanding, both theoretical and practical, of the engineering sciences and techniques and their applications to one of the branches of engineering. The adequacy of such background must be demonstrated by one of the following:
 - (a) Professional Registration: Current registration as a professional engineer in any state, District of Columbia, Puerto Rico and Guam. Absent other means of qualifying for engineering positions, those candidates who achieved such registration by means other than a written test (for example, state grandfather or eminence provisions) are eligible only for positions that are within or closely related to the specialty field of the registration. For example, a candidate who attains registration through a State Board eminence, provision as a manufacturing engineer typically would be eligible for manufacturing engineering positions.
 - (b) Written Test: Evidence of having successfully passed the Engineer-in-Training (EIT) examination or the written test required for professional registration which is administered by the Boards of Engineering Examiners in the various states, District of Columbia, Puerto Rico and Guam.

Applicants who have passed the EIT examination and complete all the requirements for bachelors degree in engineering technology (BET) that

1. included 60 semester hours of courses in physical, mathematical and engineering sciences, and in engineering as listed in the basic requirements
2. was in an accredited college or in a program accredited by the Accreditation Board of Engineering and Technology (ABET) may be eligible for certain engineering positions at GS-05. Eligibility is limited to positions that are within or closely related to the specialty field of engineering technology program.

Positions covered by the minimum educational requirement, which involve highly technical research, development or similar functions requiring an advanced level of competence in basic science are excluded.

Because of the diversity in kind and quality of BET programs, graduates of the BET programs are required to complete at least one year of additional education or highly technical work experience of such nature as to provide reasonable assurance of the possession of the knowledge, skills and abilities required for professional engineering competence. The adequacy of this background must be demonstrated by passing the EIT examination.

- (3) Specified Academic Courses: Successful completion in an accredited college or university of at least 60 semester hours of courses acceptable for credit towards a B.S. in professional engineering, in the physical, mathematical, and engineering sciences. These must have included the courses specified in the basic requirements above. The courses must also be fully acceptable towards meeting the requirements of a professional engineering curriculum as described in the basic requirements.
- (4) Related Curriculum: Successful completion in an accredited college of a full 4-year or longer related curriculum leading to a bachelor's degree in engineer technology or in an appropriate professional field, for example, physics, chemistry, architecture, computer science (not computer programming), mathematics, hydrology, or geology, may be accepted in lieu of a degree in engineering provided you have at least one year of professional engineering experience which was acquired under professional engineering supervision and guidance.

**IN ADDITION TO MEETING THE BASIC REQUIREMENT,
APPLICANTS MUST HAVE 1 YEAR OF SPECIALIZED EXPERIENCE
AT THE GS-12 LEVEL.**

Specialized experience is experience that has equipped the applicant with the particular knowledge, skills and abilities (KSAs) to perform successfully the duties of the position and that are typically in or related to the development of designs, studies, plans, specifications and cost estimates for electrical systems and equipment supporting multi-functional structures, such as laboratories, hospitals, flood protection facilities and dams, etc.

Selective Placement Factors/Knowledge Skills and Abilities (KSA's): KSA's not required. Applicants will be rated against Resumix Job Search Criteria.

Standard/Other Requirements/Instructions on How to Apply:

1. Failure to provide all of the required information as stated in the announcement may result in an ineligible rating or may affect the overall rating.
2. If qualified based on education, selectee must provide official transcript.
3. Temporary Duty (TDY) is required.
4. Permanent change of station (PCS) funds will be authorized.
5. Direct Deposit is REQUIRED: As a condition of employment, candidates appointed, competitively promoted or reassigned are required to enroll and participate in Direct Deposit/Electronic Funds Transfer within 60 days following the effective date of that action.
6. Application/Resume deadline: Application/Resume must be received by the Closing Date of the Vacancy Announcement.
7. Male applicants born after December 31, 1959, are required to complete a Pre-Employment Certification Statement for Selective Service registration prior to appointment. Failure to comply may be grounds for withdrawal of an offer of employment, or dismissal after appointment.
8. Candidates must meet Time-in-grade requirements (if applicable).
9. BASIS OF RATING: Basic eligibility will be determined by assessing the candidate's background against the appropriate OPM Qualifications Standard to include any selective placement factors. Candidates will be rated based on an evaluation of the extent and quality of their experience, education, and training as provided in their Resume. Candidates who meet the Basic Qualification Requirements will be further evaluated on the skills they possess or the extent and quality of skills for Delegating Examining that are directly related to the job duties as described in this vacancy announcement.

WHO MAY APPLY? Please refer to the specific vacancy announcement's Area of Consideration to determine if you are eligible to apply for this position. If you are eligible to apply, follow the procedures for How to Apply.
